

OUR POLICIES

SAFETY / SECURITY

We will in our daily work is always a top priority in our work environment, which means:

- That we do not use methods and materials which damage the health and personal-injury there.
- The fact that we always use the prescribed protective equipment and follow the agreed rules and instructions.
- The fact that we are working with continuous improvements in our business.

ENVIRONMENT

We must minimize our environmental impact as far as it is ecologically justified, technically feasible and economically justified. This will be achieved by working to reduce our environmental impact in a number of key areas:

- Energy
- Transport
- Material Handling
- We shall strive to exceed the imposed by law on us.
- We must prevent risks by making continuous improvements.
- We will work according to our partners dealing with environmental issues, in agreement with our requirements.
- We will give priority to the goods and services that pose less environmental impact than others products.

QUALITY

- We must be a quality-leading total supplier of welded structures.
- We shall be based on internal and external measurements are constantly improving our products and processes.
- Customer needs will guide our quality work from first contact to the finished project.
